The Amateur's Code

1. ***The Amateur is Considerate ...***
never knowingly using the air in such a way as to lessen the pleasure of others.

2. ***The Amateur is Loyal ...***
offering loyalty, encouragement and support to fellow radio amateurs, local clubs and to the New Zealand Association of Radio Transmitters, through which Amateur Radio is represented in New Zealand.

3. ***The Amateur is Progressive ...***
keeping his or her station abreast of science. It is well-built and efficient. His or her operating practice is above reproach.

4. ***The Amateur is Friendly ...***
slow and patient sending when requested, friendly advice and counsel to the beginner, kindly assistance, co-operation and consideration of the interests of others; these are the marks of the amateur spirit.

5. ***The Amateur is Balanced ...***
radio is a hobby. It is never allowed to interfere with any of the duties owing to home, job, school, or community.

6. ***The Amateur is Patriotic ...***
with knowledge and station always ready for the service of country and community.

AMATEUR RADIO

What is Amateur Radio?

Amateur Radio, also affectionately known as "Ham radio", is a hobby of constructing, experimenting and communicating with radio equipment. In New Zealand, the Ministry of Economic Development (Radio Spectrum Management) issues licenses to Radio Hams. Once licensed, an amateur can operate radio equipment from home, from their vehicle or from anywhere in New Zealand. A number of radio frequencies have been set aside for Amateur Radio. Using these frequencies a Ham can talk across town or around the world. The scope and possibilities are endless— from talking across town on your local repeater to operating in international contests or talking through Amateur Radio satellites.

Who can be Hams?

Just about anyone can become a ham. Some famous musicians, actors, kings and Prime Ministers are hams, but most are people from all walks of life who like communicating and experimenting with radio and electronics. Young people find Amateur Radio a great training ground, older people find "ham radio" an absorbing retirement hobby.

Amateur Radio is more than a hobby it is also a service. Hams willingly contribute their time, equipment and operating skills whenever the need arises especially during Civil Defence emergencies and Search and Rescue operations. The Amateur Radio Emergency Communications (AREC) are a sub group of NZART that organises emergency communications for the Emergency Services.

How do I become a Ham?

Passing a Ham licence is quite easy. For an Amateur Radio licence you need to correctly answer 40 out of 60 questions from a multi-choice question paper. The questions cover radio theory and regulations. You can download the questions from the public-domain question-bank at http://www.nzart.org.nz/nzart/exam. As a newly licensed Ham you will be able to operate on amateur bands below 5 MHz or above 25MHz. After three months operation and with 50 logged contacts you will be able to operate on all New Zealand amateurs bands.

Where do I get more information?

The New Zealand Association of Radio Transmitters (Inc.) is a non-profit association of Amateur Radio Operators. NZART has branches and instructors in most of the larger cities and towns. For more information on Amateur Radio and details of a club near you, contact: The Business Manager, NZART, Freepost 3565, P.O. Box 40-525, Upper Hutt. EDITORIAL

This year's *Call Book* has been produced in a midi format, similar to the 2005/2006 edition. This allows us to include items that have been updated since the last *Call Book* as well as a selection of useful operating information. It is anticipated that, as usual, the next Call Book will be the full size edition. Thanks to all contributors especially those who provided information at short notice. This year there has been an excellent response to requests for updates for the Branch Directory, with updates received from all but seven of the active branches. Some people send me their updated addresses details: please remember that the callsign information published in *Call Book* is directly downloaded off the Ministry of Economic Development (MED) database. At present we are unable to amend call-sign address data due to legal restraints so if you require changes to your call-sign information you must advise MED. Please also advise NZART so that their records can be kept current.

FREQUENCY MANAGEMENT TECHNICAL ADVISORY GROUP (FMTAG)

FMTAG consists of:

Chairperson, Secretary and others as appointed by NZART Council

The purpose and actions of the FMTAG are:

- Study and report to Council on matters affecting amateur radio frequencies.
- Plan future use of amateur bands
- Select frequencies for Amateur Fixed Stations
- Maintain a register of Amateur Fixed Stations
- Assists in preparing drafts for Council including submissions when needed, to the Ministry of Economic Development (Radio Spectrum Division) on behalf of the Amateur Service prior to each major ITU meeting or conference
- Bandplans are developed by the FMTAG based on IARU recommendations, local requirements, and submitted to NZART Council for approval

Application Forms for repeaters and beacons can be obtained from a NZART Councillor, NZART HQ or e-mail your request to <fmtag@nzart.org.nz>.

BRANCHES AND MEMBERSHIP

A Policy Statement by Council (Revised 1996, second revision June 2005)

Members will be aware of the requirement in paragraph 7.3 of the Association Constitution that Branches must not admit to membership persons who hold an amateur station licence, but who are not members of the Association.

Over the years there have been attempts to repeal or modify these provisions, but successive National Conferences have made it quite clear that members will have none of it. The rationale for this Constitutional provision is that it provides at least one way in which non-members can be denied the privileges which membership of the Association brings. We cannot stop our non-member brethren enjoying some benefits - such as the negotiations the Association conducts with the licensing authorities, the use of repeaters, and the enjoyment of the benefits of which bandplans bring. Council is firmly of the view that it is unfair to those that do pay their subscriptions if the lot of non-members is made easier by the ready availability of member's privileges which the Association is, in fact, able to withhold. Further, the Association has to take into account the feelings of its many voluntary workers, who devote many hours to Association matters, and, in addition, pay their subscriptions as well. These persons have even greater cause to complain if the Association makes benefits available to non-members who do not contribute to these benefits by at least joining the Association and paying a subscription.

Branch Officers

It is disturbing to Council to find that some Branches not only fail to have regard to their Constitutional obligations by ensuring that licensed amateurs who are not Association members do not join the Branch. Some Branches also have as Branch Officers persons who are licensed amateurs but not members of the Association. This is clearly unconstitutional. If an Officer is not an Association member, but is a licensed amateur, then there is a breach of the Association Constitution. This should also be a breach of the Branch Constitution - if it is not, the Branch Constitution is faulty and must be brought into line. (See the Association's Constitution—paragraph 7.3(c).)

Regrettably there are one or two branches that indulge in this fiction. The Branch attempts to evade its responsibilities to NZART, whether arising under paragraph 7.3 or otherwise, by purporting to distinguish between the local club and the NZART branch. This fiction ignores the realities, and is not acceptable. The reality is that the local club itself is the NZART branch, and the branch constitution must be changed to reflect this commitment to NZART if that is necessary. Any attempt (for that is all that it is) to circumvent the Association Constitution by resorting to this fiction is unfair to the local NZART members, other NZART members, and the Association itself.

Relationship between Branches and the Association

Sometimes, Branch members criticise these rules, often using catch phrases such as "breach of human rights", or "interference with independent clubs". These provisions of the Association Constitution are nothing of the sort. They are part of the contract that members make when they join the Association. By applying to become or by remaining an Association Branch, the Clubs or Branches surrender their independence to the extent required to conform to the Association's Constitution. Branches are expected to keep their houses in order; if they are not prepared to do this, then they should prepare to surrender their status as a Branch. There is nothing in the Human Rights Act to prevent the Association and its branches from discriminating between members and non-members.

Whose job is it to be the policeman?

The answer is—nobody's and everybody's. The Association's Constitution does not specifically charge Council or any Officer with the task of enforcement. So long as we remain members, we are all parties to the contract represented by the constitution and we each individually have that responsibility. If a Branch is incorporated in its own right, then the branch in its corporate capacity also has that duty.

Hardship

Hardship is not a ground for failing to become an Association member. Association subscriptions can be remitted under paragraph 5.1(f) of the Association Constitution and Council will authorise this where there is genuine hardship. But Council's experience has been that the genuine hardship is rare indeed. Many claims of hardship over the years have been found not to be genuine. The member should initially make application to the General Secretary for this concession. If considered necessary Council might then discretely seek further information from the Branch. Council expects that there would be very few cases in the country at any one time. The privacy of the applicant is respected by ensuring that as few persons as possible within the Association are aware of the application.

In cases of hardship, subscriptions may be paid by monthly automatic payment. The applicant should discuss this option with the General Secretary.

Why are we telling you this now?

Council has never said anything else. But there are now some situations that create special problems for the Association.

The Association enters into contracts with private landowners, public corporations and State Owned Enterprises relating to right of entry to land for the siting of repeaters. These contracts recognise potential liabilities and require the Association as a condition of the contract to take public liability insurance, which could be up to $2,000,000 or more. This insurance will be taken on terms that will extend to protect both the Association and individual members. Naturally, the corporations we are dealing with take comfort in this insurance, as they know that while the insurance is in place the Association has the indemnities required to meet any claims. The reality is that to come within the Association's cover, individuals must be members. The Association has no intention of paying additional premiums to insure against the actions of non-members. If an individual incurs liability as agent of the Association, then that individual must be a member to take the benefit of any cover the Association arranges. The Association will not appoint non-members as its agents, as this would nullify the insurance cover.

As branches have responsibility with the Association for repeaters, Branch Officers are required to be Association members. This is no more than the Constitutional requirement. Because of these matters, Council will, in future, have to be more active in seeing that the Constitution is observed.

As the appointment of repeater trustees is an Association matter, even if exercised through Branches, repeater trustees must also be members. This, likewise, is a necessary consequence of the provisions of the Constitution. Council, in future, will have to ensure that repeater trustees are Association members, not only because this is a Constitutional requirement, but also to ensure that the persons responsible for the operation of repeaters have adequate insurance cover to meet the requirements of our contracts with the public corporations.

Action

Take action now to ensure that your Branch complies with the Association Constitution. Your Councillor will help you with advice as required.

This policy statement was first published in the August 1990 Break-In. It is now reissued in a slightly revised form.

SUSTAINING THE AMATEUR SERVICE

A responsibility for all Radio Amateurs!

The amateur radio qualification is an achievable challenge for most people and is useful to career seekers in our technological world. It shows aptitude, a sincere interest in communications, and identifies an achiever. Which can give a jump over others in this competitive world. The late 1940s was a time with a wave of new entrants into amateur radio. Let us all try to promote a return to that level of interest! The NZART Council encourages newcomers into Amateur Radio. This calls for the help of all radio amateurs. As a challenge to all of us, the NZART Council has adopted the expression, "The New Wave", to embrace initiatives and objectives which will encourage new entrants to the world of amateur radio.

The NZART Constitution in its object statement says: "The objects of the Association shall be the maintenance and expansion of the Amateur Service in New Zealand by:

(a) the encouragement of recruits into the Amateur Radio movement

(b) the provision of guidance and instruction in radio techniques and operating

(c) the promotion organisation and conduct of activities on a national and local basis ...",

These objects are further reflected in wording in the NZART Strategic Plan, in particular Objective 2, which states:

"To promote knowledge of amateur radio and encourage newcomers.

"To assist Branches in local activities, especially in schools.

"To provide education and training aids.

"To award suitable prizes and other recognition."

And, in the plans of action:

"To publish information in Break-In, training materials and aids, educational and publicity material."

The NZART Strategic Plan Objective 3 states: "To provide guidance and instruction in radio techniques and operating, and encourage practical experimentation."

With your guidance and your help, others too can experience the thrills of Amateur Radio. Active encouragement and support are sought from all NZART members and Branches to recruit newcomers and to run classes in preparation for the amateur radio examination. Branches are encouraged to actively promote Amateur Radio. Master copies of brochures, posters and other leaflets and publicity material are available to Branches free of charge, from NZART Headquarters.

A sticker is available to NZART members from NZART Headquarters for 50c each. This is for displaying in the rear window of vehicles to show your support in a national campaign to increase the awareness of Amateur Radio in the general population. Many computer users are unaware of amateur radio and what it has to offer. You are encouraged to widely advertise the NZART World Wide Web page, <http://www.nzart.org.nz>.

Simple-to-construct equipment is a way to show youth groups and other interested persons the fun of Amateur Radio. Show how inexpensive

home-construction brings delight and excitement from the achievement of communicating without wires over long distances using self-built gear. Articles from *Break-In* may be freely photocopied and distributed for this purpose. Do you know anyone who has shown interest in

Amateur Radio? A youth or grandchild perhaps? Spread the word by demonstration! After passing the amateur radio examination, a call-sign that is unique worldwide is issued by the Ministry of Economic Development. The challenge to attain such an identifying callsign brings its own rewarding fun. A local "group project", with the challenge to interest newcomers to develop their own local on-air amateur radio net, is worthy of consideration and encouragement. Construction of receivers, transmitters and other projects under the guidance of experienced constructors at "club workshop nights" is a worthy Branch activity. Each Branch should appoint an "NZART Agent" as one of their executive, the task being to gain increases in NZART members, both Transmitting and Non-Transmitting, in their local areas. A national and concerted effort by all New Zealand Radio Amateurs to promote Amateur Radio is necessary to ensure the continuation of a healthy and vigorous Amateur Service.

Help bring the "The New Wave" of radio amateurs!

THE PROMOTION OF AMATEUR RADIO

Your work promoting AMATEUR RADIO is helped with this new STUDY GUIDE and sample TEST PAPERS

A **Study Guide** and sample **Test Papers** for the New Zealand Amateur Radio Examination are available:

1. The **Study Guide** and the TEST PAPERS are both available on one 3.5-inch diskette, packed in a gift folder, from NZART Headquarters. This is your chance to get computer-literate youngsters interested and involved in Amateur Radio!

Send your name and Callsign with $5 to NZART Headquarters with the name and the address of the person you wish to receive the **Study Guide** and **Test Papers.** A diskette and gift folder will be posted—with your compliments. You will be named on the gift folder.

(Installation instructions are in a .txt file on the disk and printed inside the gift-folder.)

2. The **Guide** and the **Test Papers** can also be viewed and used on-line—by anyone. Visit the NZART web page:

http://www.nzart.org.nz and follow the links.

3. Both the **Guide** and the **Test Papers** can be downloaded in separate self-extracting files for installation on your own computer. Installation details are on the web page.

Downloading is recommended, so these documents can be used at any time.

Please Note:

1. These documents can be used as a source of hand-out notes for Instructors at Radio Classes. Copy-and-paste can be used to copy material into a wordprocessor then photocopied for class use—or whole pages can be printed off.

2. The **Guide** is NOT a replacement for the NZART *Basic Radio Training Manual.* They support and complement each other.

The International Amateur Radio Union—IARU

How is the IARU Managed and Administered?

The IARU is co-ordinated by an Administrative Council (AC), with a President, Vice-President and two representatives from each of the three Regions. One society provides the IARU Secretary and the International Secretariat (IS) that provides administrative services. The American Radio Relay League (ARRL) carries out these tasks from their headquarters in Newington, Connecticut and thus make a major contribution to amateur radio on our behalf.

We need to acknowledge the support given to the IARU by the amateurs in the USA who are members of ARRL.

AMATEUR RADIO BAND USAGE

NEW ZEALAND AMATEUR RADIO BANDPLANS P1 OF 2

These charts show the New Zealand bandplans. **These bandplans are to ensure that your transmissions do not impose problems on other operators and that their transmissions do not impact on you. It is to the advantage of all operators that the published bandplans be used.** The Ministry of Economic Development (MED) defines the band limits, while the internal band segments are derived from the IARU Region 3 bandplans with New Zealand adaptations. The band limits are found in *Schedule 3* (attached to each amateur radio licence) and on the NZART web site in the Study Guide (Regulations). http://www.nzart.org.nz/nzart/exam/
The Region 3 bandplans are at the IARU Region 3 web site. http://www.jarl.or.jp/iaru-r3/r3bandplan.doc

130 to 190 kHz – 1800 metres
Radiated power must not exceed 5 W e.i.r.p.

The frequencies are in kHz for 1800 metres

1.800 to 1.950 MHz – 160 metres

3.500 to 3.900 MHz – 80 metres

7.000 to 7.300 MHz – 40 metres

18.068 to 18.168 MHz – 17 metres
Amateur satellite service permitted in whole band

21.000 to 21.450 MHz – 15 metres
Amateur satellite service permitted in whole band

24.890 to 24.990 MHz – 12 metres
Amateur satellite service permitted in whole band

26.950 to 27.300 MHz – 11 metres
Telemetry or telecontrol only, 5 W e.i.r.p. maximum.
Also designated for Industrial, Scientific and Medical purposes

28.000 to 29.700 MHz – 10 metres
Amateur satellite service permitted in whole band

51.000 to 53.000 MHz – 6 metres
SSB/CW calling 52.05 MHz, FM calling 52.525 MHz. 53.6-54 MHz available for MED approved fixed transmitters.
MED permitted operation only 50-51 MHz.
Refer to the *Additional Note* indexed in the Regulations part of the Study Guide on the NZART web page:

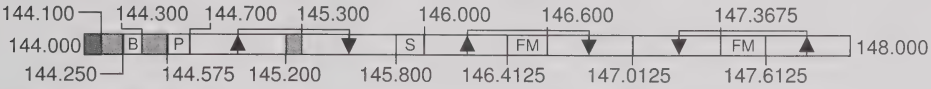
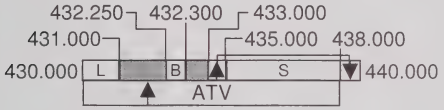
NEW ZEALAND AMATEUR RADIO BANDPLANS P2 OF 2

144.000 to 148.000 MHz – 2 metres
Amateur satellite service permitted in the range 144-146 MHz. Oceania SSB calling 144.1 MHz, ZL calling 144.2 MHz, FM calling 144.5 and 146.475 MHz. Primary packet/digipeater 144.65 MHz, other frequencies available. Below 147 MHz, repeater offset -600 kHz, otherwise +600 kHz; Beacons 144.250-144.300 MHz



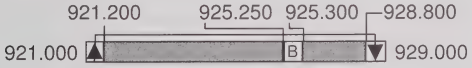
430.000 to 440.000 MHz – 70 cm
Amateur satellite permitted in the range 435-438 MHz. SSB calling 432.2 MHz, FM calling 432.5 MHz, Beacons 432.25-432.30 MHz. Primary packet/digipeater 432.65 MHz, other frequencies available. Repeater offsets -5 MHz in most cases, +5 MHz otherwise. In general, the ATV repeaters have an input frequency of 431.250 MHz vision, 436.750 MHz FM sound and 437.100 MHz NICAM sound



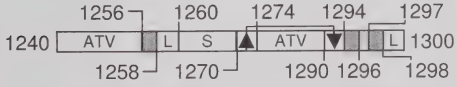
614.000 to 622.000 MHz – 50 cm
ATV vision carrier 615.25 MHz ITU(R) system G

ATV Repeater Outputs Only

921.000 to 929.000 MHz – 32 cm
Power 25 W e.i.r.p., SSB calling 925.2 MHz, FM calling 925.5 MHz. Beacons 925.25-925.30 MHz
Also designated for Industrial, Scientific and Medical



1240 to 1300 MHz – 23 cm
SSB calling 1296.2 MHz, FM calling 1296.5 MHz. Beacons 1296.25-1296.30 MHz. ATV video carriers 1241.25, 1249.25, 1275.25 and 1283.25 MHz ITU(R) system G. Repeaters -20 MHz offset. Amateur satellite service in band 1260- 1270 MHz, uplink only

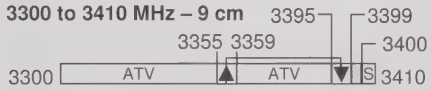


To find the narrow band segment bandplan for the microwave bands, please look for *Simplex and Calling Frequencies* that can be found elsewhere in this Call Book

For key to codes see page 1

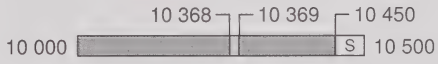
2396 to 2450 MHz – 12 cm
Standard 1 MHz narrow band segment 2424-2425 MHz. SSB calling 2424.2 MHz, FM calling 2424.5 MHz. Beacons 2424.25-2424.30 MHz. ATV in segments 2408-2422 and 2432-2446 MHz, ITU(R) system B. Repeaters -20 MHz offset. Amateur satellite service in 2400-2450 MHz. 2400-2450 MHz is also designated for Industrial, Scientific and Medical (ISM) purposes

3300 to 3410 MHz – 9 cm



5650 to 5850 MHz – 5 cm
Satellites 5650-5670 MHz earth-to-space only; 5830-5850 MHz space-to-earth only

10 000 to 10 500 MHz – 3 cm



24 000 to 24 250 MHz – 1.2 cm

47 000 to 47 200 MHz – 6 mm
Amateur satellite available on the entire band

75 500 to 81 000 MHz – 4 mm
Amateur satellite available on the entire band

DX PacketCluster

by
MURRAY WOODFIELD ZL1CN
CHRIS HANNAGAN ZL2DX

The DX PacketCluster is a packet BBS provided especially for DX operators. While it has the normal bulletins and mail facilities normally associated with a packet BBS, it also has many other features of interest to DX operators.

For example, if anyone logged on to the DX PacketCluster hears some interesting DX, this "DX spot" can be put up on the Cluster for the benefit of any others who may be logged on. The others will see the DX spot in real time, and anyone interested can tune up and work the DX station. This is the prime purpose of the DX PacketCluster.

There are also other features such as WWV sunspot information which can be put up, a list of current DXCC countries with prefixes, headings and distances from your QTH, and sunrise and sunset information for each country.

Various DX bulletins are put up on the Clusters from time to time.

Note that the ZL2AQY-10 PacketCluster is connected permanently to a network of Clusters operating in Australia, North America and Europe as is ZL2ARN-10. This means that information posted on the network is accessible to amateurs in New Zealand. ZL2AL-10 also receives this information all PacketClusters in New Zealand are linked.

The following is the information for those interested in connecting to a DX PacketCluster:

ZL2AQY-10 Auckland Access through Klondyke node, ZL1AB-1 on 144.600 and

ZL1PK-1 in Hamilton.

South Island access is also available through ***ZL3VML-6*** in Christchurch, ***ZL1AMC-1*** in Invercargill, ZL2AL-1 in Hawkes Bay or any node with ***ZL2AQY-10*** in its nodes listing.

Access also through the internet: Telnet: zl2aqy.ath.cx:9000.

ZL2ARN-10 Waikanae Access on Climie repeater on 438.600 and 145.425

Access also through the internet: Telnet zl2arn.ath.cx:7300

ZL2AL-10 Hastings Access on 144.65

Efforts will also be made to extend the network further, depending on the availability of resources.

If you are keen on DX on any band, including VHF and UHF, then the DX PacketCluster is for you. Even if you have no experience at packet, you will benefit from connecting to a Cluster, and staying connected while you are tuning the band—you will even be able to put up spots and information yourself for the benefit of others.

Further information is available from the sysops, Eddie ZL2AQY and Gordon ZL2ARN.

Eddie Olsen ZL2AQY and
Murray Woodfield ZL1CN

Notes

(1) New Zealand 70 cm band has now been reduced from 420–450 MHz to 430–440 MHz. The Video (TV Record of 31/01/1982 on 425 MHz stays as a 70 cm Record.

(2) New Zealand 13 cm band has now been reduced from 2300–2450 MHz to 2396–2450 MHz. The Records of 31/01/1982 and 18/10/1987 stay as a 13 cm Record. This band now known as 12 cm band.

(3) 50 cm band has now been reduced and changed from 610–620 MHz to 614–622 MHz. The Record of 23/04/1988 stays as a 50 cm Record.

(4) /p means portable operation.

(5) /# means operating in another state or district.

(6) 32 cm 925 MHz ZL2TRV-ZL1TBG 30/11/2002 620 km with high power permit.

(7) Propagation Modes: Line of Sight (LOS), Tropo duct (TD), Tropo scatter (TS), Meteor Scatter (MS), and F2 layer.

Notes

Propagation modes are tropospheric refraction and ducting (including line-of-sight paths), divided into in four categories: Tropo (A) (tropospheric modes across the Atlantic, Caribbean, and Gulf of Mexico); Tropo (C) (tropospheric modes across continental North America; Tropo (E) (tropospheric modes across Europe); Tropo (P) (tropospheric modes across the Pacific); Aurora (auroral scatter); Auroral E (auroral E); Sporadic E (sporadic E); FAI (E-layer field-aligned irregularities; IFS (ionospheric forward scatter); Meteors (meteor scatter); TE (transequatorial field-aligned irregularities); and Rain scatter (precipitation scatter).

Note on operational status. Branches have stated that the following stations are operational, or are expected to become operational, during the currency of this *Call Book*.

Note on repeater input/output offsets. Most repeaters receive LOW and transmit HIGH, except 7025 to 7375 on 2 metres and 434.xxx National System repeaters.

Note on update status. N in the right-hand column indicates that the Branch has not supplied update information by 2007.08.12.

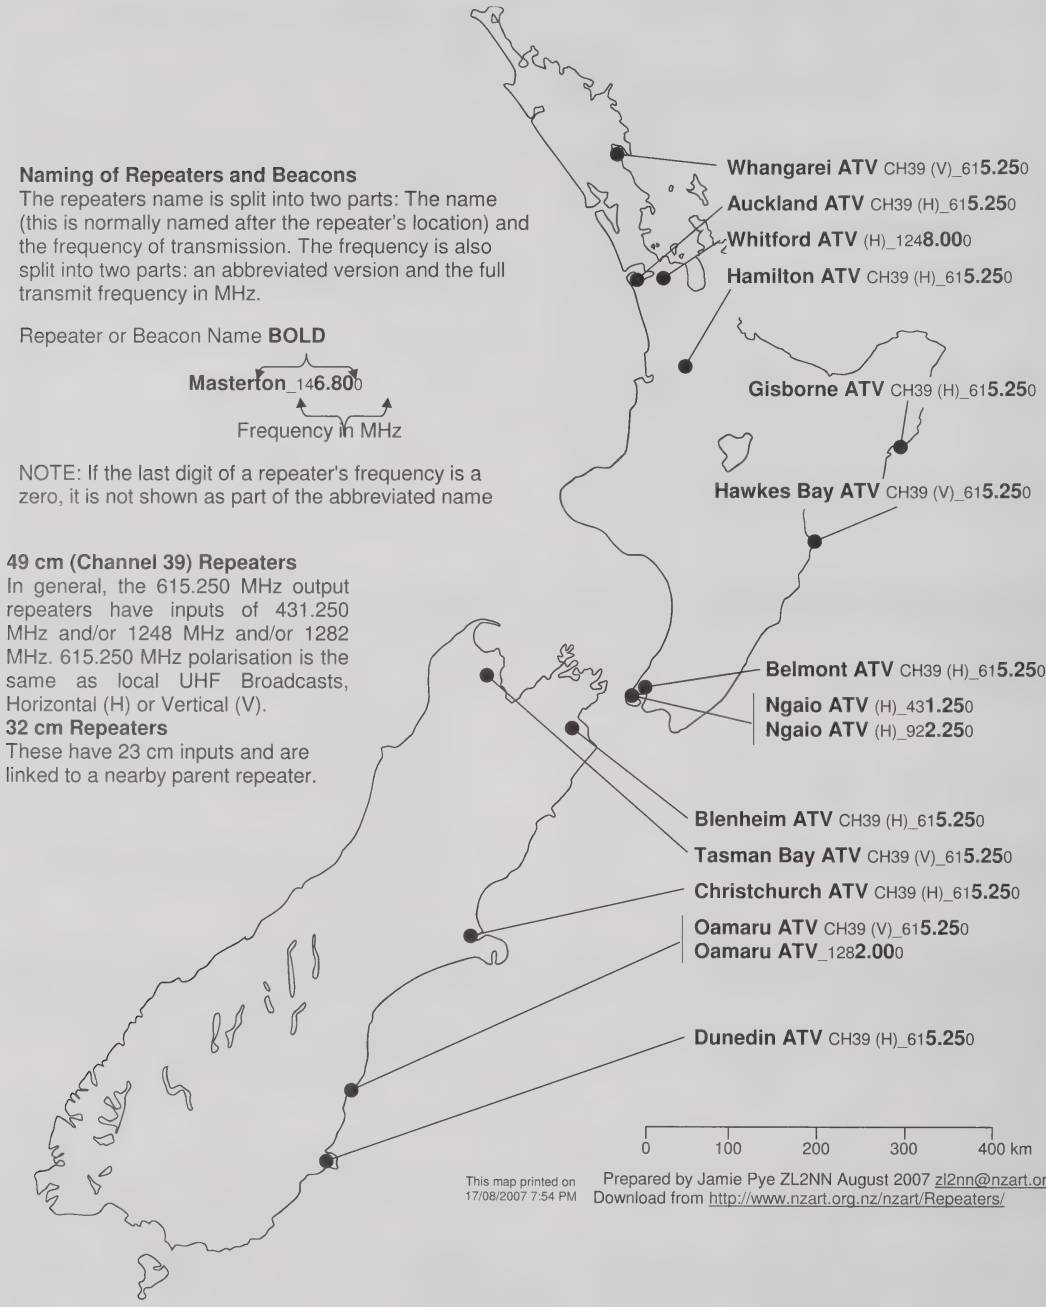
NOTE Repeater **Offsets (splits)** are explained on the map **New Zealand Amateur Radio National System 2007**



Naming of Repeaters and Beacons
The repeaters name is split into two parts: The name (this is normally named after the repeater's location) and the frequency of transmission. The frequency is also split into two parts: an abbreviated version and the full transmit frequency in MHz.

Repeater or Beacon Name **BOLD**

Masterton_146.800

Frequency in MHz

NOTE: If the last digit of a repeater's frequency is a zero, it is not shown as part of the abbreviated name

49 cm (Channel 39) Repeaters
In general, the 615.250 MHz output repeaters have inputs of 431.250 MHz and/or 1248 MHz and/or 1282 MHz. 615.250 MHz polarisation is the same as local UHF Broadcasts, Horizontal (H) or Vertical (V).

32 cm Repeaters
These have 23 cm inputs and are linked to a nearby parent repeater.

NCDXF/IARU INTERNATIONAL BEACON NETWORK

The NCDXF, in co-operation with the IARU, constructed and operates a worldwide network of high-frequency radio beacons on 14.100, 18.110, 21.150, 24.930 and 28.288 MHz. These beacons help both amateur and commercial high-frequency radio users assess the current condition of the ionosphere. The entire system is designed, built and operated by volunteers at no cost except the actual price of hardware components, shipping costs, and so on.

In principle, one can simple listen on the beacon frequencies and copy the CW call-signs of the various beacons to figure out where the band is open, but in practice, not every ham operator can copy calls at twenty-two words per minute and some beacons may be heard at too low a signal strength to catch the call. Becuase the beacons tranmit at known times, it is easy to know which beacon one is hearing without actually copying the CW call-sign. Since the beacons are running 100 W to a vertical, even a weak beacon signal may indicate a path with excellent propagation for stations using higher power and directive antennas.

For the latest information see the NCDXF website at <http://www.ncdxf.org/beacons.html>.

Table 1. NCDXF/IARU Beacon Transmission Schedule

As at August 2007.

Each transmission is repeated every three minutes, day and night. This table gives the minute and second of the start of the first transmission within each hour of each of beacon on each frequency. A transmission consists of the call-sign of the beacon sent at 22 words per minute followed by four one-second dashes. The call-sign and the first dash are sent at 100 watts. The remaining dashes are sent at 10 watts, 1 watt and 0.1 watts.

OLD TIMERS' CLUB (ZL)

by ROY SYMON ZL2KH

The objects of the Old Timers' Club (ZL) are set out in our Constitution adopted in 1993. They are as follows:

(1) To recognise service to Amateur Radio;

(2) To revive and maintain interests and good fellowship among the older members in the common cause.

(3) To offer advice and encouragement to newer Amateurs.

The Club is affiliated to the New Zealand Association of Radio Transmitters (Inc).

The Annual General Meeting is held on the Sunday morning of Queen's Birthday weekend (in conjunction with the NZART Conference) so it is possible that there will be changes in those holding office after that date.

A National Single Side-band Net is held every Sunday morning at 9.30 am. The call-sign is ZL6OTC. The frequency is 7.058 MHz but if propagation is poor on 40 m, the net may QSY to 3.865 MHz. An AM Net is also run on Sunday morning at 10.30 am on 3.850 MHz. The Secretary gives the Club News at 10.00 am on the SSB Net.

Full membership is available to any holder of a ZL call-sign who has held an amateur licence for the last 25 years or more and is still an active amateur.

In addition, Associate Membership is available to any ZL amateur who has attained the age of 60 years (and over) and has been an active amateur for 10 or more years. Voting privileges are not available to Associate Members.

Application Forms for membership may be obtained from a District Representative, from the National Secretary, or can be downloaded from the NZART web page: <www.nzart.org.nz>. A joining fee of $10.00 is payable on application.

Evidence of eligibility which is to be submitted shall include, full name, present call-sign, original call, operator's certificate number and date of original licence. All applications for membership shall be proposed and seconded by present OTC members.

On acceptance a Certificate is issued to all Full and Associate Members, and they will be listed in the Blue Book. In addition further handsome certificates are available on request to those who attain 50, 60, 70, and 75 years of Amateur Service.

All members of OTC are eligible to wear the Peacock Blue NZART Badge with callsign so long as they are financial members of NZART. This badge is available from NZART HQ at the current price of the similar black membership badges.

Articles relating to all aspects of OTC or of vintage radio for publication in the OTC section of *Break-In* are welcomed by, and should be addressed to our Scribe, Roy Symon ZL2KH, 25 Annandale Street, New Plymouth.

JAMBOREE ON THE AIR

October 20 and 21 2007
October 18 and 19 2008

updated by ANDREW BARRON ZL3DW

JOTA is an annual event in which about 500,000 Scouts and Guides all over the world make contacts with each other by means of amateur radio. It is a real Jamboree during which Scouting and Guiding experiences are exchanged and ideas are shared, thus enhancing worldwide Scouting and Guiding. JOTA has been held annually since 1958. 2007 is a special year for Scouting as it is their centennial year. The Golden Jubilee Jamboree on the Air (JOTA) will be held over 48 hours on 20 and 21 October 2007, with the theme: "*Around the World in 50 hours*". A general overview of all of these activities will be found at <http://home.tiscali.nl/worldscout>. Visit also the JOTA pages at <www.jimparnell.co.nz>. Jim Parnell ZL2APE is the National Organiser for JOTA in New Zealand.

There are great potential benefits to amateur radio by encouraging young people to take part in JOTA as it introduces them to the hobby that you as an amateur enjoy. So it is in the interests of NZ amateurs to anticipate invitations by Scouts and Guides and approach their leaders, offering their services and equipment.

The easiest way for Scouts and Guides to take part in JOTA is for them to visit an amateur station sometime during the JOTA period. At the station, the amateur operator establishes contacts with other amateur stations then hands over the microphone to the Scouts and/or Guides. Satellites, packet, SSTV and other modes of communication (including email) are now used for JOTA as well as the normal modes using HF and VHF/UHF.

Many stations are set up at Scout or Guide Headquarters, or at some local "interesting" or appropriate venue. Other JOTA stations are set up at camps, with the radio activities being incorporated into the camping programme.

Meetings

The Annual General Meeting is held annually at Queen's Birthday Weekend in conjunction with the NZART Conference.

Aims and Objects

To preserve Amplitude Modulation as a means of Amateur Radio communication.

General

In order to keep expenses to a minimum, membership lists, financial statements, information, etc., sought by members will be sent on receipt of a stamped and addressed envelope. The information sought will be sent as soon as possible.

Nets

There are nets operating at present on AM on 3.850 MHz at the following times:

Friday evenings at 2000 hours (Northern area based).

Those interested are urged to call "CQ AM" on 3.850 MHz AM any evening at 2000 hours local time if they want a QSO.

Subscription

$5.00, payable once only on joining. A collection will be taken up each year at the Annual General Meeting, and donations will always be acceptable.

Bulletins

Bulletins are sent out regularly by e-mail to those who have provided their e-mail addresses. These are sent by the "blind copy" method so individual's addresses are not circulated to everyone. The bulletins include news, requests for information, parts and equipment available, parts or equipment wanted, plus anything else that might be of interest to members.

WARO New Zealand Women Amateur Radio Operators — Call-sign ZL6YL

Object

To promote and encourage interest in Amateur Radio amongst women.

WARO was formed in 1961–62 by a small but keen group of YL transmitters and has steadily grown both in numbers and enthusiasm.

For the annual subscription (currently $15.00 for New Zealand members) members receive four quarterly Bulletins containing items of interest to operators and friends, with special attention to YL activities.

Associate members—YLs who do not have a transmitting licence are welcome, as are YLs from overseas, many of whom are sponsored by ZL members.

Friends of WARO—persons who support WARO may become Friends of WARO by making a donation of not less than the current subscription.

The Thelma Souper Memorial Contest is held annually in early April in honour of our founder. It is open to YLs and OMs and is held on the lower end of the 80 m band.

The WARO Achievement Award may be awarded annually to persons nominated by their peers for outstanding achievements in any aspect of Amateur Radio. Nominations close at the end of March each year and the Award is presented at the AGM in June. The form this takes is the Myrtle Earland Memorial Rosebowl in honour of New Zealand's first licensed YL.

WARO also operates several awards including the WARO Award and the Mountain Buttercup Award. For further details on these see the Awards section elsewhere in this *Call Book*.

DX sponsorship

It is great to sponsor a YL from another YL organization—increases your awareness of other countries and their people. We have DX-sponsored members from all over the world and it does help to forge greater bonds between all of us. To sponsor a YL contact the Sponsorship Secretary for further information and contacts. It costs the value of a DX membership subscription and the chance to exchange news and views with each other.

YL Get-Togethers

These are held regularly throughout the country as well as the annual Get-Together at the time of our AGM in June. Consider going along to these affairs—they are a lot of fun.

WARO Bulletin/*Break-In* page

Copy is always required for these publications and any news/views of/by or from members are very welcome by the two persons concerned. Photographs are especially welcome—how about sending some in NOW.

Enquiries are always welcome from any YL for membership/fellowship in all of our activities. Feel free to contact any of the abovementioned YLs or any other member of WARO. And always be on the lookout for ZL6YL—our own call-sign.

NZART STOLEN REGISTER

by ROY SYMON ZL2KH

The Stolen Equipment Register is operated by Roy Symon ZL2KH on behalf of NZART, for the benefit all radio amateurs and is only as effective as the rate of reporting thefts. Thefts are an invasion of privacy, traumatic, and antisocial. They can also be seen by some as being an opportunity for upgrading equipment at the expense of the insurance company. Whatever the attitude you take when you are robbed - please report the event to me so that it might be prevented from happening to someone else.

Details of stolen equipment to be notified to

Roy Symon, ZL2KH,

Address

25 Annandale Street, New Plymouth.

Telephone

(06) 758-2156.

Cellular

021-630-427

E-mail

<zl2kh@nzart.org.nz>.

This is to be in writing and to include all relevant details such as: make, model, where and when stolen, and a copy of the notice from the Police verifying that the theft has been notified to them.

Any notification made to me by telephone or packet must be confirmed as soon as possible, in writing, as accurate records are a necessity and help to prevent malicious or false reports getting into the system.

There should be a declaration from the owner that the equipment belonged to them and that, to the best of their knowledge, all the details supplied are true and correct.

A lot of the details I find necessary will not be published. The lists will only show the make, model, serial number, date stolen; whereas I would need to know the location, owner's name and address, Police station to which notification was made, etc.

Updates of stolen equipment will be published in *Break-In*, HQ Info-Line, and will be on the NZART Official Broadcast.

I have compiled a cross-indexed database so that any parameter can give a match or access - and it is possible to give an answer re listing or otherwise over the phone in a similar manner to that given to people purchasing a car - all care and no responsibility though as the list could never be guaranteed as being complete. I would merely be able to state that a particular serial number did or did not appear on the list.

The aim of keeping this register is to make stealing amateur equipment unattractive (or even downright repulsive) to the stealer; to prevent amateurs purchasing stolen equipment and subsequently having it confiscated; and to recover stolen equipment for the rightful owner. The temptation to buy a very cheap rig that has fallen off the back of a truck should be resisted at all times—the next gear stolen could be YOURS!

Please notify me, as soon as possible, of any stolen equipment that is recovered - it can then be withdrawn from the register and will help me measure the success of the scheme.

Useful Formulae

- Wavelength (in metres)
  Free space = 300/f(MHz)
  Half-wave wire dipole = 143/f(MHz)
- Resonant frequency of an LC circuit
  $f = 0.159155/\sqrt{(LC)}$
- The quality factor or Q of a circuit at resonance is
  $Q = 2\pi f L/r$
- The 3 dB bandwidth of such a single tuned circuit
  B = f(res)/Q
- Estimate of transformer rating
  Output = 31 A^2 Watts
  where A = core cross-section in sq.ins.
  or Output = 4.8 A^2 Watts if A is in sq.cm.

Ohms Law

$V = IR = W/I = \sqrt{WR}$
$I = V/R = W/V = \sqrt{W/R}$
$R = V/I = V^2/W = W/I^2$
$W = VI = I^2 R = V^2/R$

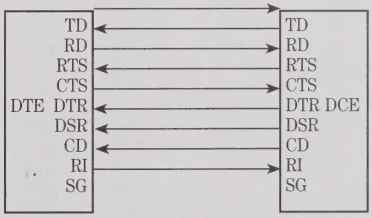
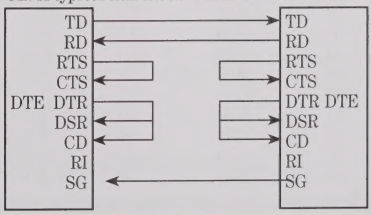
Common RS-232C Connections

Each signal (except ground) is either an input or an output depending whether it is on the Data Terminal Equipment (DTE) (eg, a computer terminal) or the Data Circuit Terminating Equipment (DCE) (eg, a modem). A typical connection is shown below.



When two computer terminals (DTEs) are connected together, a "null modem" hook-up is needed to fool each DTE into thinking that it is connected to DCE. A typical null modem connection is shown below.

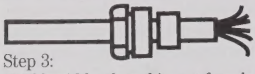


COAXIAL PLUG ASSEMBLY

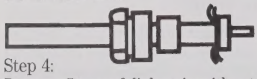
BNC Type (Female)

Step 1:
Cut end of cable evenly and remove 8 mm of outer sheat.

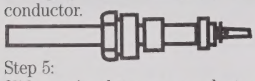
Step 2:
Side clamp nut and pressure sleeve over cable, and comb out braid.



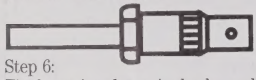
Step 3:
Fold braid back and insert ferrule between braid and dielectric. Trim off excess braid.



Step 4:
Remove 5 mm of dielectric without damaging centre conductor. Tin conductor.

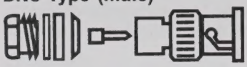


Step 5:
Slide rear insulator over conductor hard against rear insulator. Solder contact to conductor.



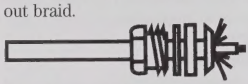
Step 6:
Fit front insulator in body and push sub-assembly onto body. Slide pressure sleeve into body and screw in the clamp nut to clamp cable.

BNC Type (Male)



Step 1:
Cut end of cable evenly, and remove 7 mm of outer sheath.

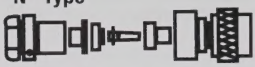
Step 2:
Slide clamp-nut, washer and rubber spacer over cable. Slide pressure sleeve over braid, and fan out braid.



Step 3:
Fold back braid against pressure sleeve and trim off excess. Strip 4 mm of inside insulation off centre wire. Solder pin onto centre wire.

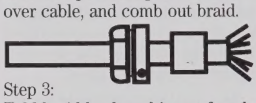
Step 4:
Fit assembly, pin first, into main receptacle. Push washer, rubber spacer and clamp nut up and screw into place.

"N" Type



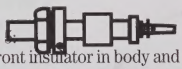
Step 1:
Cut end of cable evenly and remove 9 mm of outer sheath.

Step 2:
Slide clamp nut and pressure sleeve over cable, and comb out braid.



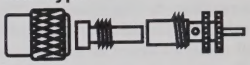
Step 3:
Fold braid back and insert ferrule between braid and dielectirc. Trim off excess braid and remove 5.5 mm dielectric without damaging inner conductor. Tin end of conductor.

Step 4:
Slide rear insulator over conductor and position against end of dielectric. Slide contact over conductor until hard against rear insulator. Solder contact to conductor.



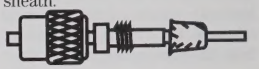
Step 5:
Fit front insulator in body and push sub-assembly into body. Slide pressure sleeve into body and screw in the clamp nut to clamp cable.

UHF Type

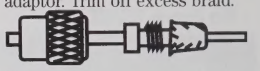


Step 1:
Cut end of cable evenly and remove 27 mm of outer sheath.

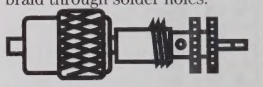
Step 2:
Slide coupling ring and adaptor onto sheath. Fan braid back over sheath.



Step 3:
Compress braid around cable and position adaptor so braid fans over adaptor. Trim off excess braid.



Step 4:
Remove 12.5 mm dielectric and tin conductor. Screw the plug assembly onto cable and solder plug to braid through solder holes.



Step 5:
Solder conductor to centre pin and screw coupling ring onto assembly.

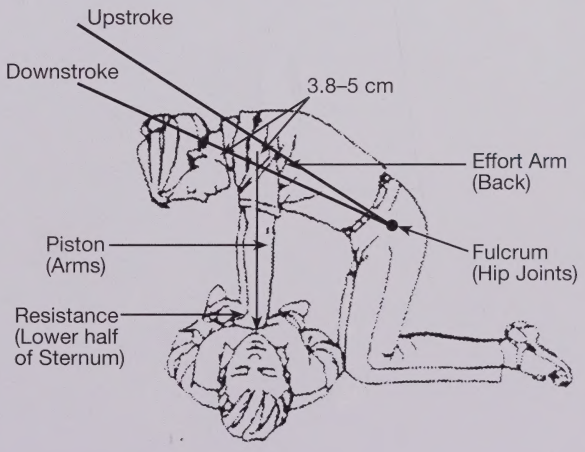
Single Rescuer C.P.R.

Initial Approach
- Ensure own safety
- Assess consciousness ("are you okay?")
- Call/yell for help
- Position victim

Airway
- Clear airway (remove objects/fluids from mouth
- Open airway: head tilt–chin lift

Breathing
- Check breathing—10 seconds—LOOK, LISTEN, FEEL
- Rescue breathing: Give two effective breaths (up to five attempts)

Circulation
- Check for signs of circulation (10 seconds only)
- Rate 100
- Ratio 30/2
- After 30 compressions give two effective breaths



Checks
- Reassess for signs of circulation every three minutes

Continue C.P.R. Until:
- The victim's own pulse and breathing have been restored
- A doctor or other health professional takes over
- You are exhausted

DO NOT GIVE UP

Even when things look hopeless, until trained help arrives

Battery Masta

We can supply new or repacked battery packs for all HT models with 12 months warranty.

We have been involved with all aspects of rechargeable battery packs for several years and enjoy an excellent reputation throughout New Zealand and internationally. We specialise in repacking all battery packs and assembling packs to your own design. Often you will need battery packs that are no longer available. We can help as we are carrying ex-stock more different size batteries than any one else in New Zealand

WHAT IS REPACKING?

Repacking/refurbishing/replacement means we use your old battery pack cases and very carefully open them up and using a very hi-tech spot welder we weld the batteries together and then reassemble them back into the case and test them with our specialist programmed equipment. We take great care in opening the cases and often you cannot tell the difference.

WHY REPACK?

Repacking is cheaper than buying new.
When repacking, where possible, we install higher capacity cells which give longer use time between charges. If you buy new, the battery packs COULD be well past their shelf life (much depends on how long they have been in storage in the supply chain) which means they may not be as good as repacking.
We are authorised Sanyo and Panasonic dealers, which are by far the best cells available, but we also have access to other brands if required.

WE CAN REPACK OR ASSEMBLE THE FOLLOWING

- Cordless power tools
- Laptop computers
- GPS systems
- UPS systems
- All 2-way radio battery packs
- Industrial electronic packs
- Back-up battery nicad, nimh or li-ion
- Cordless shavers
- Cellphones
- Cordless phones
- All hobby packs, receiver and transceiver
- Emergency lighting
- Assembled packs for industrial designers
- Custom-designed packs
- Surveying equipment
- Medical equipment
